AI • OCR • RULES • SHARED CONTEXT • ORCHESTRATION

The Healthcare Journey Doesn't End at Discharge

FRAGMENTED

Documents and information are scattered across sources.

MANUAL

Patients repeatedly enter, verify, compare, and submit information.

OPAQUE

Charges, schemes, and claim decisions are difficult to understand.

OBJECTIVE

Replace fragmented post-discharge administrative processes with one unified AI-assisted decision-support platform.

- > Reduce repetitive work
- > Reuse patient context
- > Improve transparency
- > Enable structured action

One Platform. Five Bounded Workflows.

AROgyARAKSHAK · SPECIALIZED WORKFLOWS

BillNyay

"Is my hospital bill correct?"

POST-DISCHARGE BILL AUDIT

DawaCheck

"Are my medicines fairly priced?"

MEDICINE PRICE BENCHMARKING

SchemeSetu

"What healthcare schemes may I be eligible for?"

GOVERNMENT SCHEME ELIGIBILITY

DaaviSetu

"How do I prepare my insurance claim?"

INSURANCE CLAIM AUTOMATION

BimaNyay

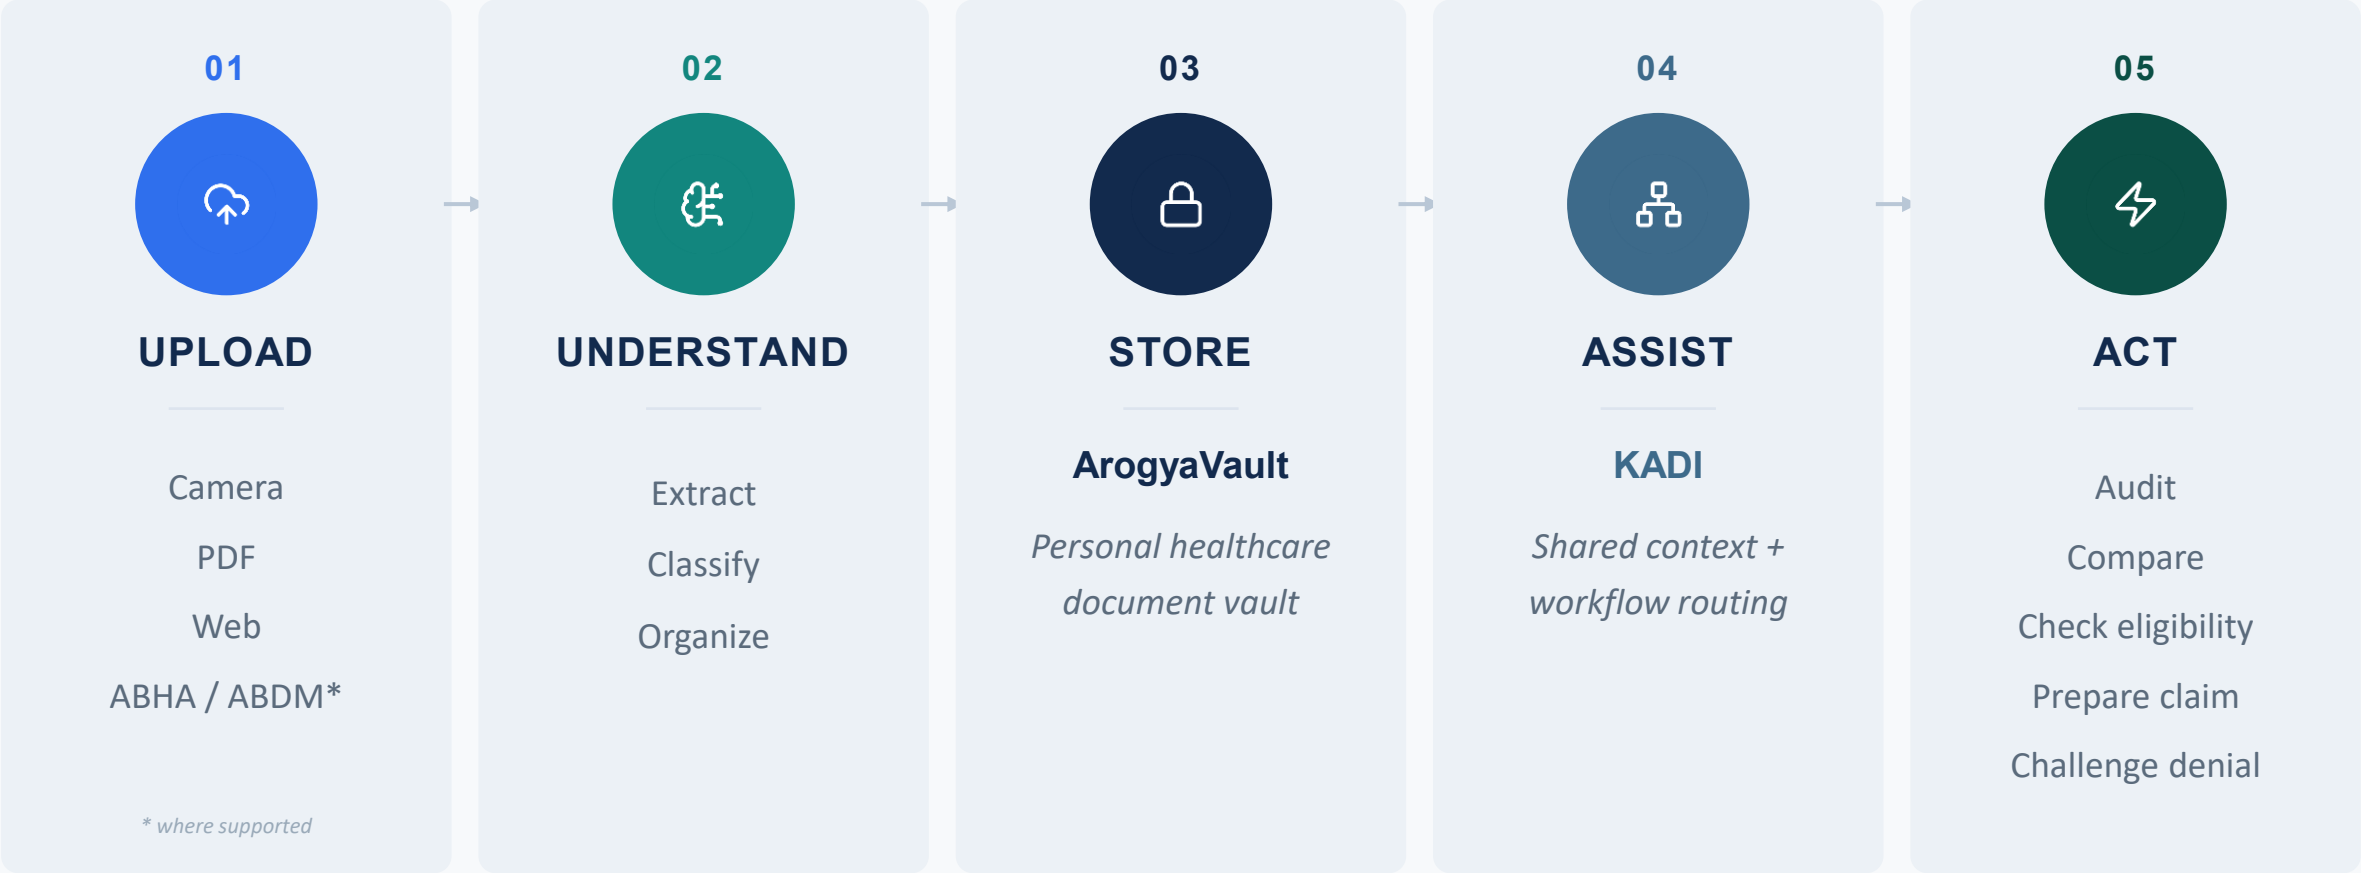

"My claim was denied. What can I do?"

CLAIM DENIAL ANALYSIS + GRIEVANCE ASSISTANCE

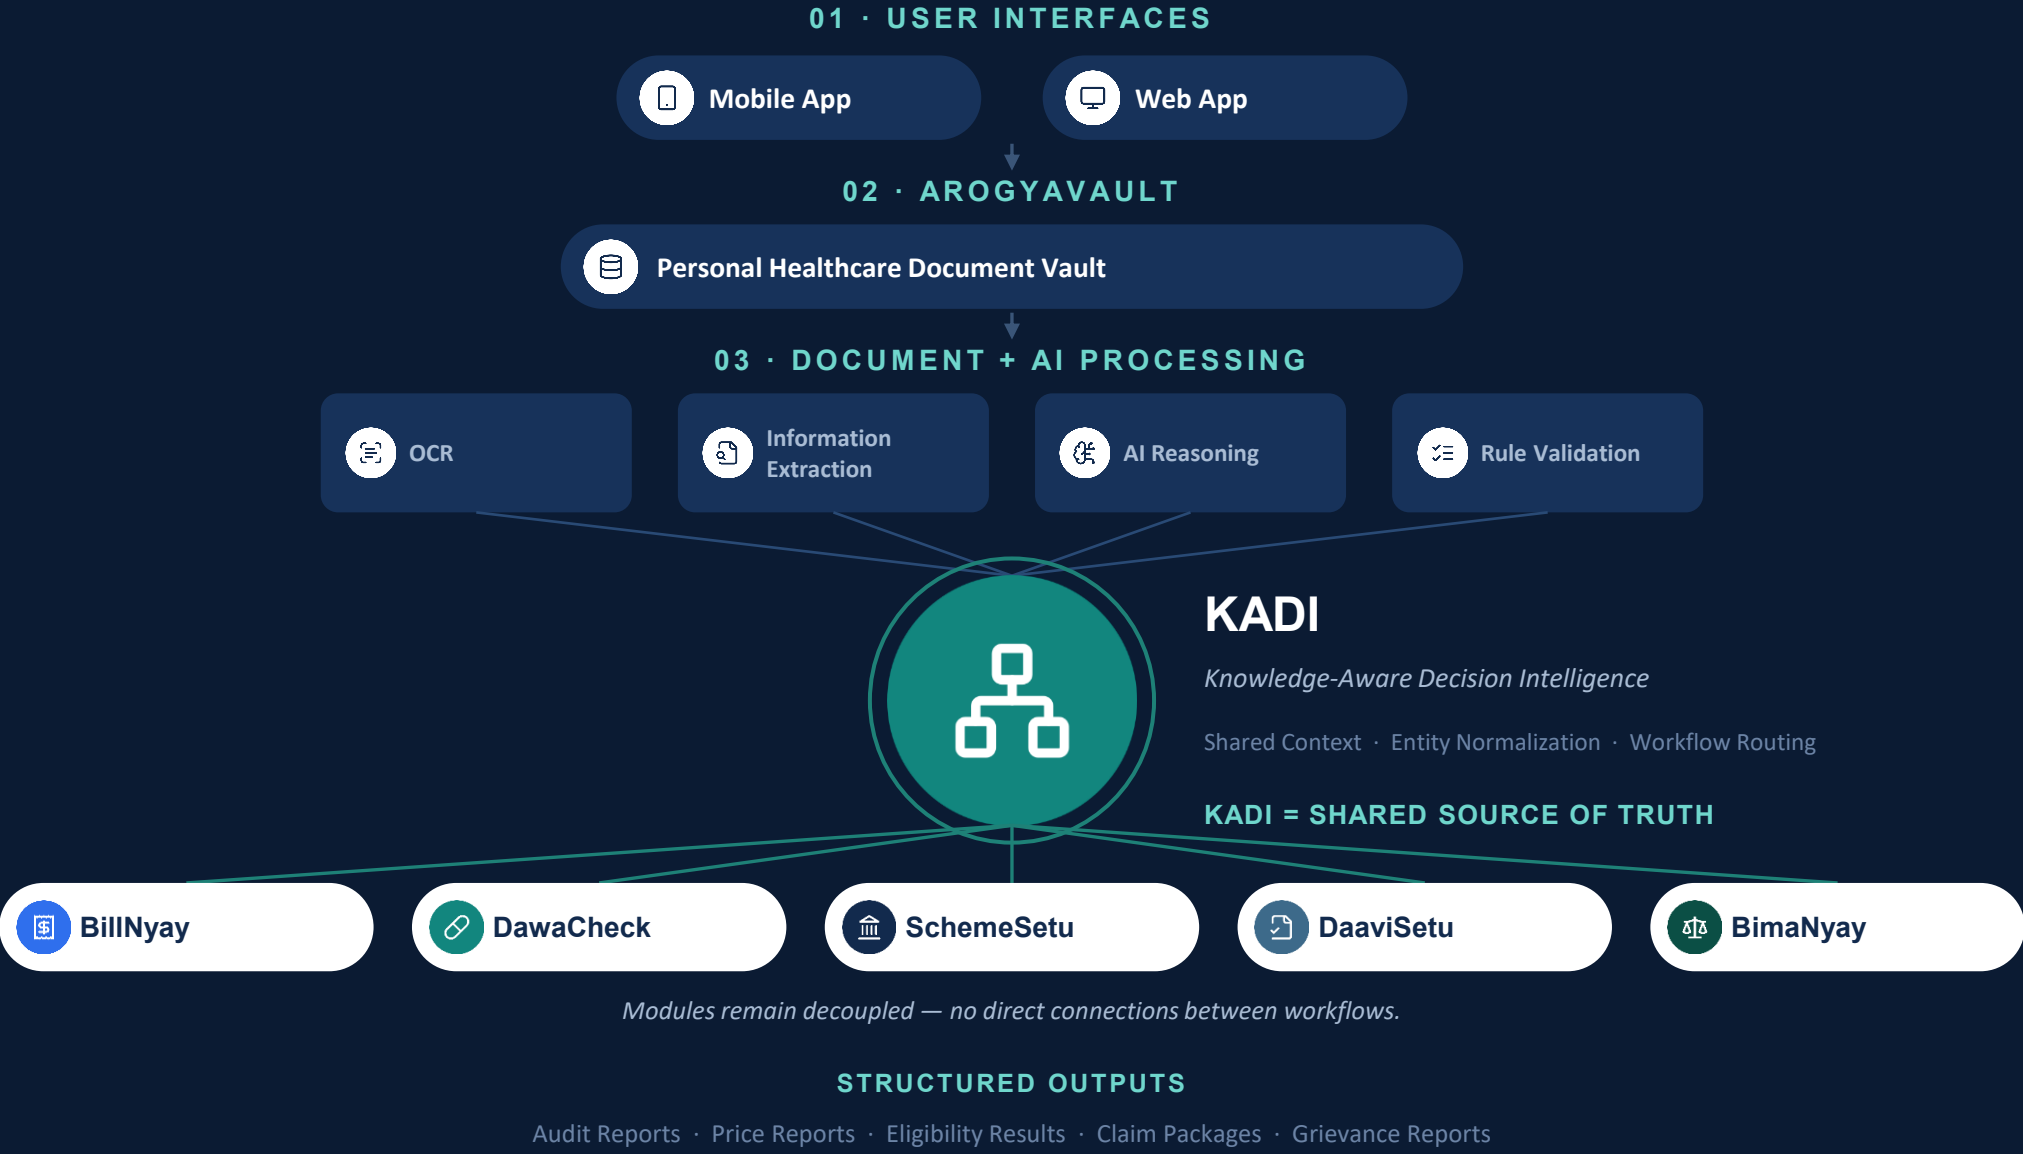

BOUNDARIES

Post-discharge administrative workflows · Decision-support only · No diagnosis or treatment · No automatic approvals · No live EMR / insurer APIs initially · English-only · OCR depends on document quality

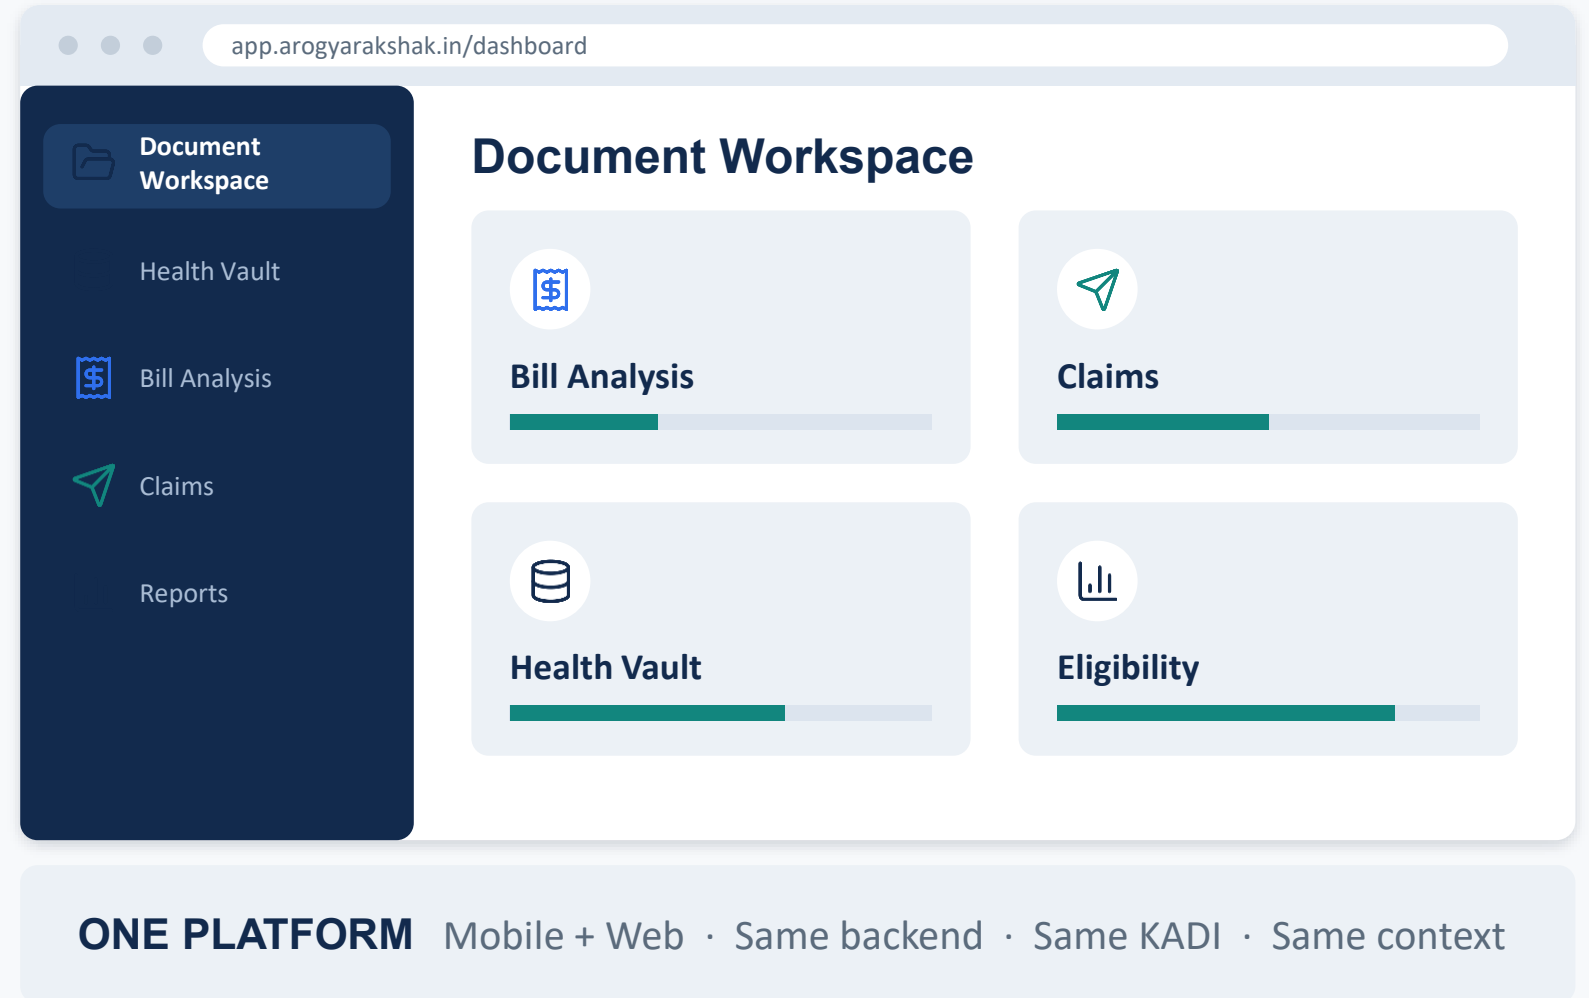

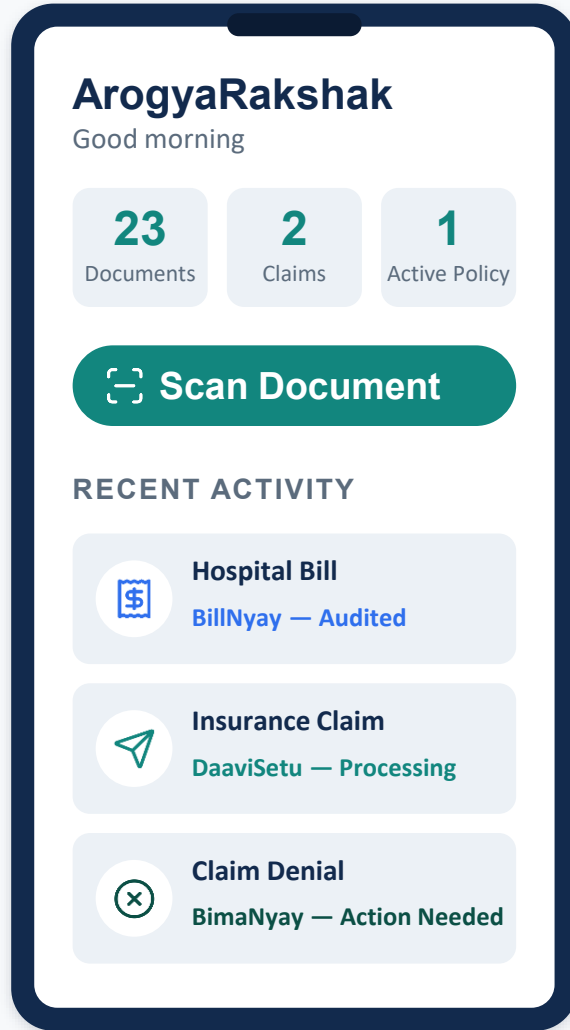

From Discharge Documents to Action

Proposed System Architecture

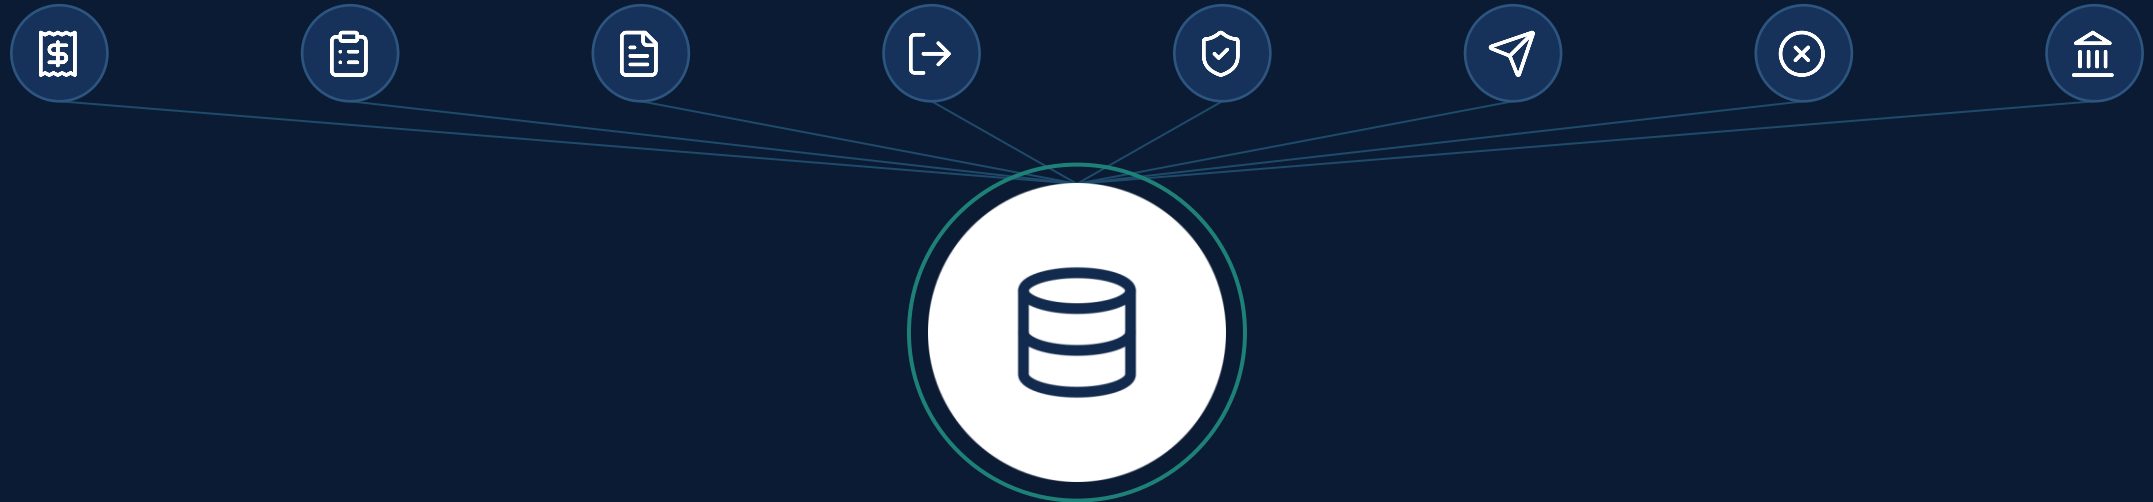

Designed Around the Patient

Conceptual interface mockups — illustrative only.

ArogyaVault — Your Personal Healthcare Document Vault

BILLS · PRESCRIPTIONS · REPORTS · DISCHARGE SUMMARIES · INSURANCE · CLAIMS · DENIALS · SCHEMES

LOCAL

Secure access · Offline availability

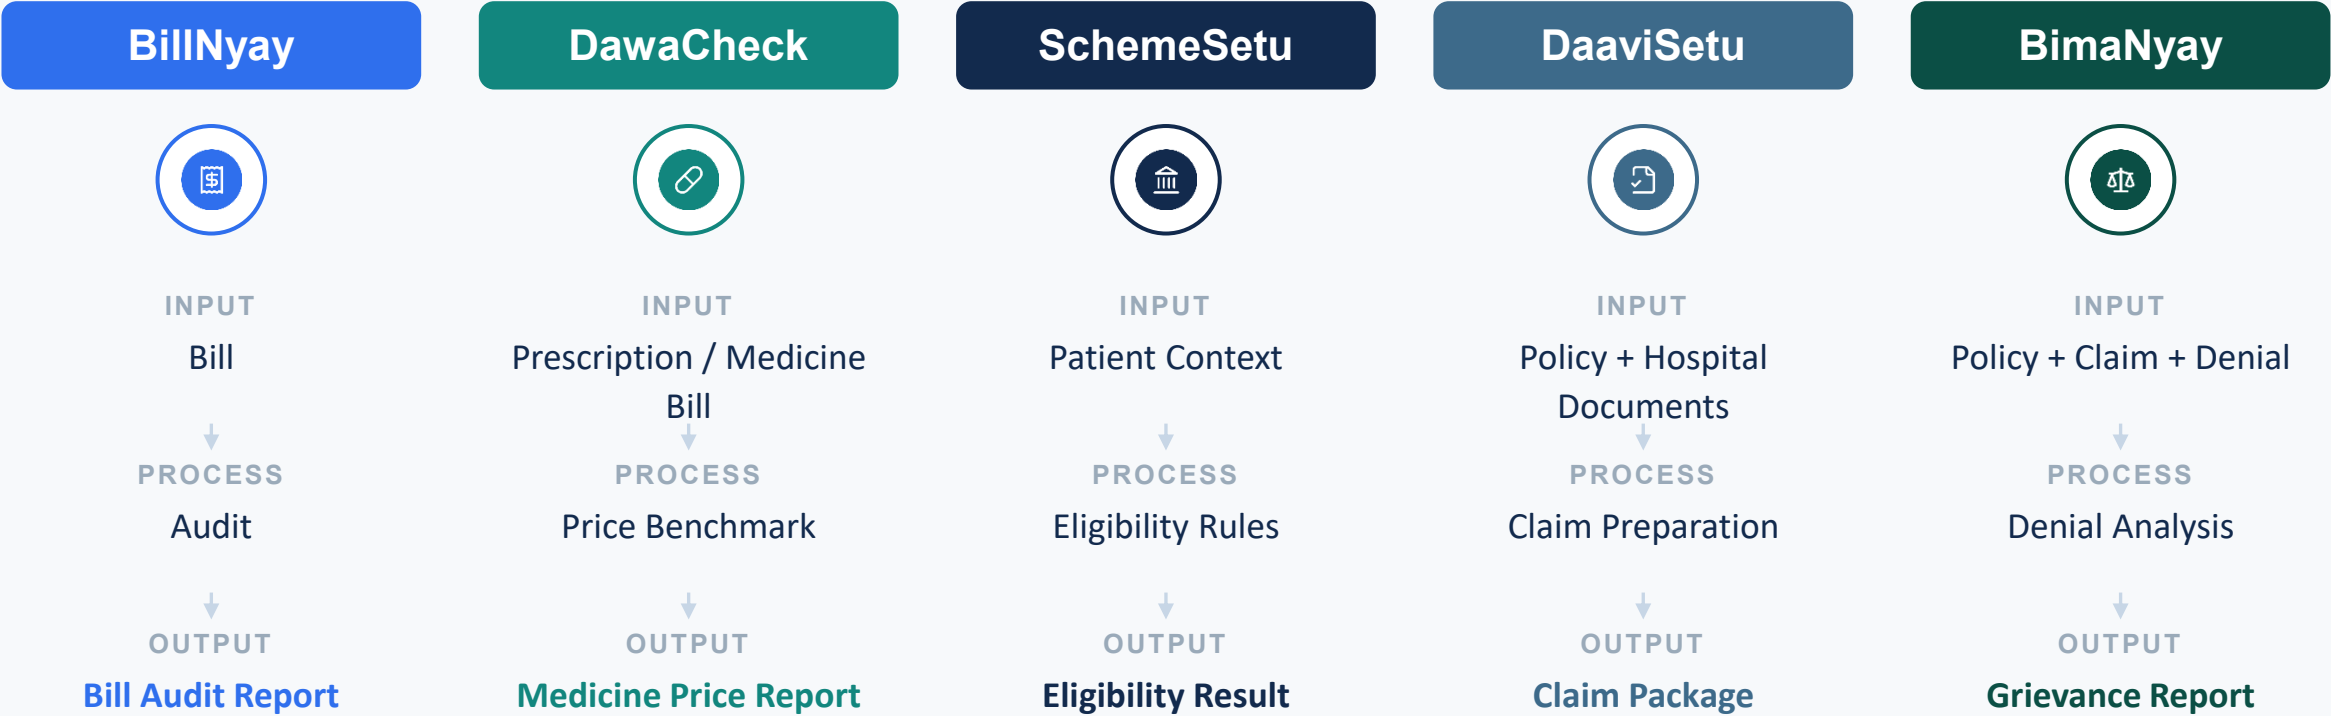

CLOUD

Backup · Synchronization

AROGYAVULT → KADI → REUSABLE CONTEXT

"A user-controlled document layer — not a replacement for hospital EMRs or ABHA."

From Documents to Decisions

VERIFY → COMPARE → DISCOVER → CLAIM → REDRESS

Designed for Transparency & Responsible Decision Support

TRANSPARENCY

- Structured outputs
- Clear findings
- Reusable context

AUDITABILITY

- Rule-based validation
- Traceable outputs
- Human review

PRIVACY

- User-controlled records
- Secure local storage
- Controlled synchronization

BOUNDARIES

- No diagnosis
- No autonomous approval
- No binding recommendations

VALIDATION DIMENSIONS

OCR accuracy

Audit correctness

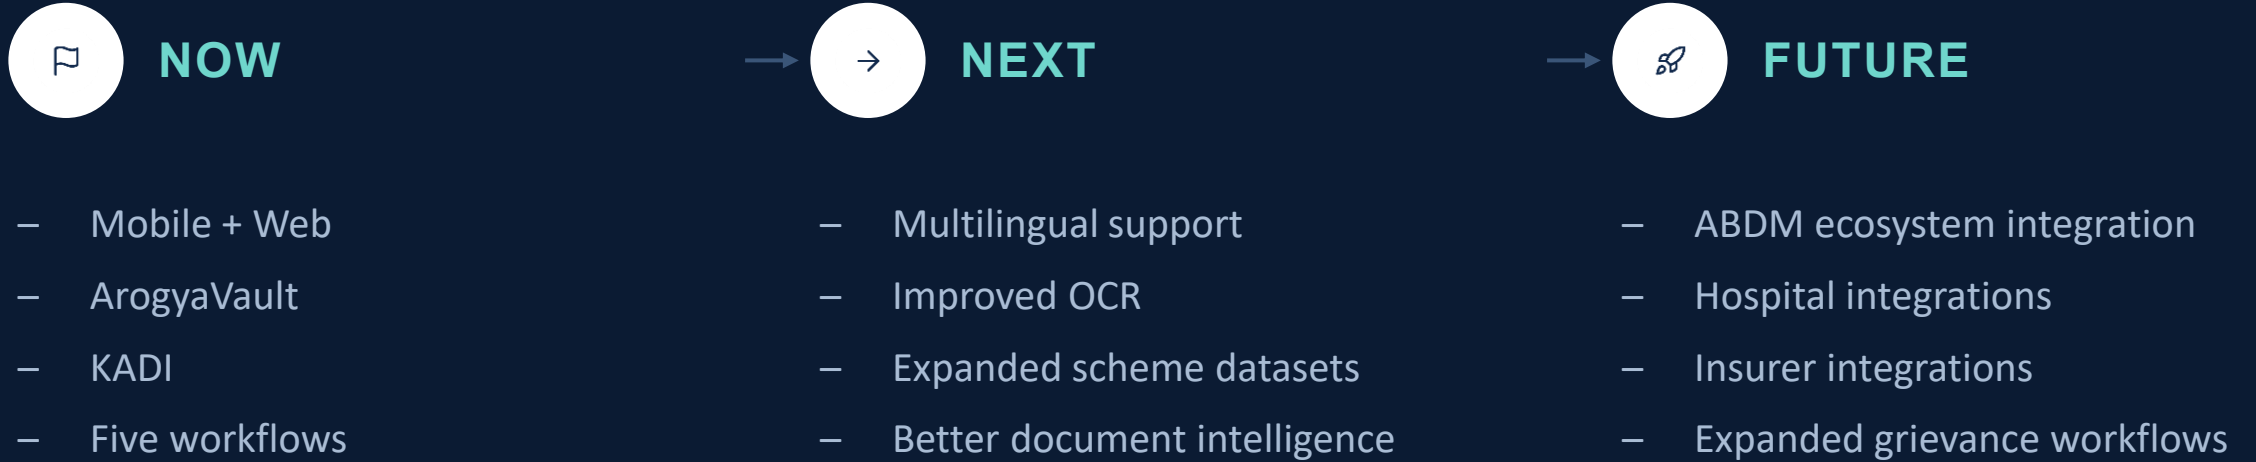

Eligibility correctness

Claim completeness

Denial analysis quality

Processing efficiency

From Fragmented Documents to Unified Healthcare Administration

ArogyaRakshak turns fragmented post-discharge healthcare administration into one context-aware, AI-assisted workflow.

ONE PLATFORM

Mobile + Web + ArogyaVault

ONE SHARED INTELLIGENCE LAYER

KADI

FIVE SPECIALIZED WORKFLOWS

BillNyay • DawaCheck • SchemeSetu • DaaviSetu
• BimaNyay

From documents → understanding → action.
